

BIO-3, pipelined vLLM, CPU intervals and concurrent GPU activity

Width is total elapsed time across calls. Rows show nested recorded operations; horizontal position is not query time.

Orange: scheduler methods. Blue: PyTorch and CUDA API operations on the CPU. Gray: thread interval or unrecorded time.

GPU labels and green strips show active seconds; dark gray strips show idle time. Overlap does not imply launch attribution.

Unrecorded CPU time is not CPU idle time. Python call stacks were not recorded.

Open [bio3_join_profile.html](#) to zoom and read complete names, small operations, and deeper levels.
